

# Choosing the correct size crate for your animal

Dimensions for dog crates are typically represented by Length (L), Width (W) and Height (H).

**What size crate will I need for my dog?**  
 Use the following steps to determine correct dimensions.

**Length**  
 Measure from the tip of your dogs nose to the base of their tail then add 5 cm to your measurement, which will give you the correct length of your pet's crate.

**Height**  
 If your dog has pointed (erect) ears measure from the tip of their ears to the floor while they stand normally. For dogs with floppy ears measure from top of head to floor. Add 5 cm to your measurement for the correct crate height.

**Width**  
 Measure the widest part of your dog's shoulders.

**Good Fit**      **Bad Fit**  
 Your dog should be able to stand normally without the top of their head touching the crate.

Crate Size	Vol Weight KG	Crate Cost	Measurements (L x W x H)
NR 1	8	R220.00	45 X 30 X 35
NR 2	13	R275.00	55 X 35 X 40
NR 3	16	R330.00	60 X 35 X 45
NR 4	22	R350.00	65 X 40 X 50
NR 5	28	R385.00	75 X 45 X 50

Crate Size	Vol Weight KG	Crate Cost	Measurements (L x W x H)
NR 6	41.5	R470.00	85 X 50 X 65
NR 7	55.5	R580.00	95 x 50 x 70
NR 8	72	R690.00	105 x 55 x 75
NR 9	88	R790.00	110 x 60 x 80
NR 10 <small>ONLY AVAILABLE ON FREIGHTER</small>	110	R880.00	120 x 65 x 85
